CAREER OBJECTIVE

Aspiring AI & Data Science student seeking opportunities to apply skills in Python, ML, and web development. Eager to contribute to innovative projects, gain hands-on experience, and grow as a data-driven problem solver.

WORK EXPERIENCE

Artificial Intelligence And Data Analytics • Internship

Jan 2025 - Feb 2025

Edunet Foundation, Virtual

Completed a 4-week virtual internship in Artificial Intelligence and Data Analytics focused on Green Skills, organized by AICTE, Shell India Markets Pvt. Ltd., and Edunet Foundation under the Skills4Future program. During the internship, I developed a Convolutional Neural Network (CNN) model to classify images of plastic waste into categories, aiming to support efficient and automated waste management systems. This project enhanced my understanding of deep learning, image classification, and the practical application of AI in solving real-world environmental challenges.

EDUCATION

B.Tech, Ai(Artificial Intelligence)& Data Science(DS)

2023 - 2027

Dr. D Y Patil School Of Engineering & Technology

CGPA: 9.10/10

TRAININGS / CERTIFICATIONS

Data Science

Apr 2025 - Present

Code With Harry, Virtual

Currently pursuing an online Data Science course by CodeWithHarry, covering essential topics such as Python programming, data analysis, data visualization, NumPy, pandas, Matplotlib, and introductory machine learning concepts. This course is enhancing my practical understanding of core data science tools and techniques, preparing me for real-world applications and projects.

MERN Stack / DSA (c++) Full Placement Batch

Jan 2025 - Present

Sigma 6.0 APNA COLLEGE, Virtual

Enrolled in Apna College's Sigma 6.0 Full Placement Batch, a comprehensive program covering MERN Stack Web Development, Data Structures & Algorithms (DSA), and Quantitative Aptitude. Gaining hands-on experience in building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Strengthening problem-solving skills through regular DSA practice and aptitude training to prepare for coding interviews and placement drives.

PORTFOLIO

[GitHub link ↗](#)

[CodeChef link ↗](#)

[Kaggle link ↗](#)

PROJECTS

[car price prediction ↗](#)

Apr 2025 - May 2025

Developed a Car Price Prediction model using machine learning techniques to estimate the resale value of used cars based on features like brand, year, mileage, fuel type, transmission, and more. Utilized data preprocessing, feature engineering, and regression algorithms (such as Linear Regression or Random Forest) to achieve accurate predictions. Gained hands-on experience in model training, evaluation, and deployment of data-driven solutions.

[CNN image classification ↗](#)

Jan 2025 - Feb 2025

This project focuses on automating waste segregation using a Convolutional Neural Network (CNN) model. The system is trained to classify images of waste into distinct categories such as organic, recyclable, and hazardous. The objective is to promote efficient waste disposal practices and support smart city initiatives.

Key Highlights:

- Developed a custom CNN architecture using TensorFlow/Keras.
- Preprocessed and augmented image datasets to improve model robustness.
- Achieved high classification accuracy with proper validation and testing.
- Deployed the model for real-time inference on new waste images.
- A step toward sustainable and automated waste management solutions.

SKILLS

- | | | |
|----------------|-------------------------------------|-------------------|
| • Python | • JavaScript | • HTML |
| • CSS | • C Programming | • C++ Programming |
| • Data Science | • Database Management System (DBMS) | • MS SQL Server |
| • MERN | • Machine Learning | • Java |
| • SQL | • Node.js | • Express.js |
| • MongoDB | • Pandas | • NumPy |
| • scikit-learn | • Matplotlib | • TensorFlow |
| • Keras | • Git | • GitHub |
| • VS Code | • Jupyter Notebook | • Google Colab |

EXTRA CURRICULAR ACTIVITIES

- Secured 2nd place in Carrom Tournament at College Annual Sports Event
- Passionate about competitive coding and problem-solving on platforms like LeetCode
- Interested in Artificial Intelligence, Deep Learning, and Open Source Contributions
- Enthusiastic gamer and tech reviewer
- Actively participated in organizing and managing technical events at my college, including "Escape Room" and "Glitch Hunt." Contributed to planning event flow, coordinating with teams, and ensuring smooth execution. These activities helped enhance my leadership, teamwork, and problem-solving skills in a dynamic environment.

ADDITIONAL DETAILS

- Developed CNN-based Waste Classifier, Car Price Prediction System, Attendance Monitoring System, and E-commerce Website. Participated in Escape Room & Glitch Hunt events. Skilled in Python, ML, and Web Dev with a strong AI & Data Science foundation.
